# ZERO LINE PRESSURE CONVEYOR

- 24v dc ZLP (Zero Line Pressure) rollers, length can be split into various sections, each with a basket detection PEC mounted on the opposite side of the conveyor to the packing stations.
- This PEC will ensure the basket is stopped alongside the packing stations making the removal of the basket easy for the operator.
- The philosophy of the line is such that a basket will always be driven to the last packing station unless the zone is occupied, if this is the case then the baskets will queue in sequence.
- Once a basket has been removed the upstream basket will move and fill its place.
- Variable height and speed to suit your needs.

**1 YEAR PARTS  
REPLACEMENT  
WARRANTY**

*You choose overall length, roller width,  
roller colour, height and speed.*

✓ **HARD WEARING**

Solid reliable design and build provide essential low maintenance.
